

House Elevation

A 3D architectural rendering of a modern house elevation. The house features a two-story design with a mix of materials: light gray stucco, dark gray stone veneer, and white concrete. Large windows with dark wood frames are prominent on both levels. A central entrance is visible on the ground floor. Two silver cars are parked in the driveway in front of the house. A small potted plant sits on the right side of the driveway. The scene is set during the day with soft shadows.
